

# Applied Communications Group

ACG Connects You to Your Customers

## **Applied Communications Group, Inc.**

specializes in the supply, design and installation of Communications Systems and other low voltage systems providing the right level of infrastructure for end users. Together, with this, we offer a complimentary range of products and services. These full service applications provide Structured Cabling Systems, Telephone Services, Security Systems, Paging Systems and Full Project Management with a Design & Build Service.

From finding out what your specific needs are, to keeping you satisfied long after our installation is complete, ACG will give you a package that is tailored to meet your needs. Our business offers you smart choices that address your concerns and meet your requirements - it really is that simple.

We have forged strong relationships with leading manufacturers, while maintaining vendor independence. This enables our company to supply system solutions that meet and match your unique situation.
